CS AGENTS BUILD

- **Renewal Intelligence Agent:-** Help CSMs forecast the possibility of an account to renew or churn enabling them to action out plans to ensure retention of logos 2 quarters in advance.
- **CSM Call Summarizer Agent:-** Helps CSMs summarize their call to keep the counterparts informed without manual efforts.
- **CSM Call Talk Track:-** Help the CSMs to prepare a talk track on pointers to discuss with the customers, enhancing customer engagement with a value driven approach.
- **CSM Account Intel Agent:-** Help CSMs to be informed on public news of their accounts which could lead to expansion opportunities (such as product launch, new acquisition, partnership or procure funds) or detect threat signals (staff cut, loss of funds) and action accordingly.
- **Churn Analysis Agent:-** Helps the CSM team to retrospectively analyze the accounts that churned by performing L1, L2, L3 root cause analysis of the accounts and learn lessons for the next quarter.
- **Account Usage Agent:-** Not all CSMs are masters of data to convey story behind it which is why a lot of threat signals go unnoticed which is why inspired me to build this agent to capture the usage of product with feature level audits and differentiated use of features.
